

Release Plan - Team Citrus - TimeLime - 12/2/18

Revision 1 - 10/9/18

High Level Goals:

A free social networking website that is based around the idea that the posts are temporary and disappear after a certain unit of time. Users may upload a variety of content such as text posts, photos and videos. The content which users upload will be visible on their respective profile as well as on the timeline of their friends. Since this is a social networking site it is implicit that users will build connections between other members of the site, the members that they build connections with will be able to view the users content via a timeline or by viewing the users profile. Users may interact with each others posts via comments and reactions to posts. Finally if users desire to communicate privately they may send each other private messages.

User Stories for Release:

Sprint 1:

As a developer, I want a place to host and manage the project so that the project can be developed. **(10)**

As a developer, I want only authorized users to be able to access the platform so that it remains secure. **(9)**

As a user, I want to be able to post information about myself and post my thoughts so that others will know who I am and what I am thinking. **(31)**

Sprint 2:

As a user, I want to be able to search for my friends and find new friends so I can share my posts and connect with them. **(12)**

As a user, I want to browse all of my own and my friends' posts in one place so I can see a variety of posts without navigating multiple pages. **(45)**

Sprint 3:

As a user, I want to be able to comment on a text post so the other user will clearly see my response to their post without navigating away from the original post. **(9)**

As a user, I want to be able to quickly react to another user's text post so I can share my thoughts on the post without taking the time to make a text post. **(9)**

Sprint 4:

As a user, I want to be able to directly message other users so I can communicate with them easily, but also privately. **(10)**

Product Backlog — High Level Goals:

Users may change how long their own posts last before they are automatically deleted. The timeline will contain not only a user's posts and their friends' posts, but also posts from users who are nearby (by using location detection). Users would have the ability to create groups of only certain users or create private messages with multiple people at once.

Product Backlog — User Stories

As a user, I want to be able to control how long my own posts are visible before being deleted so that some posts can last longer, while others are shorter. **(8)**

As a user, I want to connect with other people nearby so I can make new friends and share my posts with them. **(30)**

As a user, I want to be able to form groups with only certain people so I can communicate privately with more than one person. **(25)**
