

# Sprint 1 Plan - TimeLime - Team Citrus - 9/22/18

## Revision 1 - 10/9/18

---

### Goal:

Implement the basics of registering users including login/logout. Create user page which will require designing page, basic user profile information, as well as posting text posts.

---

### Task listing:

As a developer, I want a place to host and manage the project so that the project can be developed **(10)**

- (Donovan) Identify a hosting platform from which to host the database **(3)**
- (Donovan) Install the database on the identified platform **(5)**
- (Donovan) Create a firebase account for the project **(1)**
- (Donovan) Fill in firebase/init.js with firebase API key **(1)**

As a developer, I want only authorized users to be able to access the platform so that it remains secure. **(12)**

- (Caesar) Design a user registration form. **(3)**
- (Caesar) Implement the user registration form **(3)**
- (Kenji) Design a user login form. **(3)**
- (Kenji) implement the user login form **(3)**

As a user, I want to be able to post information about myself and post my thoughts so that others will know who I am and what I am thinking **(29)**

- (Mia) Design a profile page **(2)**
- (Mia) Implement the profile page **(8)**
- (Kenji) Implement the text post functionality **(8)**
- (Caesar) Retrieve all of the user's texts post from the database to be shown on the profile page **(8)**
- (Mia) Implementation to gather 1 sentence bio **(5)**

---

### Team roles:

**Caesar:** Team Member, Developer

**Donovan:** Project Owner, Team Member, Developer

**Kenji:** Team Member, Developer

**Mia:** Scrum Master, Team Member, Developer, Designer

---

## Initial task assignment:

### Caesar:

As a developer, I want only authorized users to be able to access the platform so that it remains secure.

- Design a user registration form. **(3)**
- Implement the user registration form **(3)**

As a user, I want to be able to post information about myself and post my thoughts so that others will know who I am and what I am thinking

- Retrieve all of the user's texts post from the database to be shown on the profile page

### Donovan:

As a developer, I want a place to host and manage the project so that the project can be developed **(10)**

- Identify a hosting platform from which to host the database **(3)**
- Install the database on the identified platform **(5)**
- Create a firebase account for the project **(1)**
- Fill in firebase/init.js with firebase API key **(1)**

### Kenji:

As a developer, I want only authorized users to be able to access the platform so that it remains secure

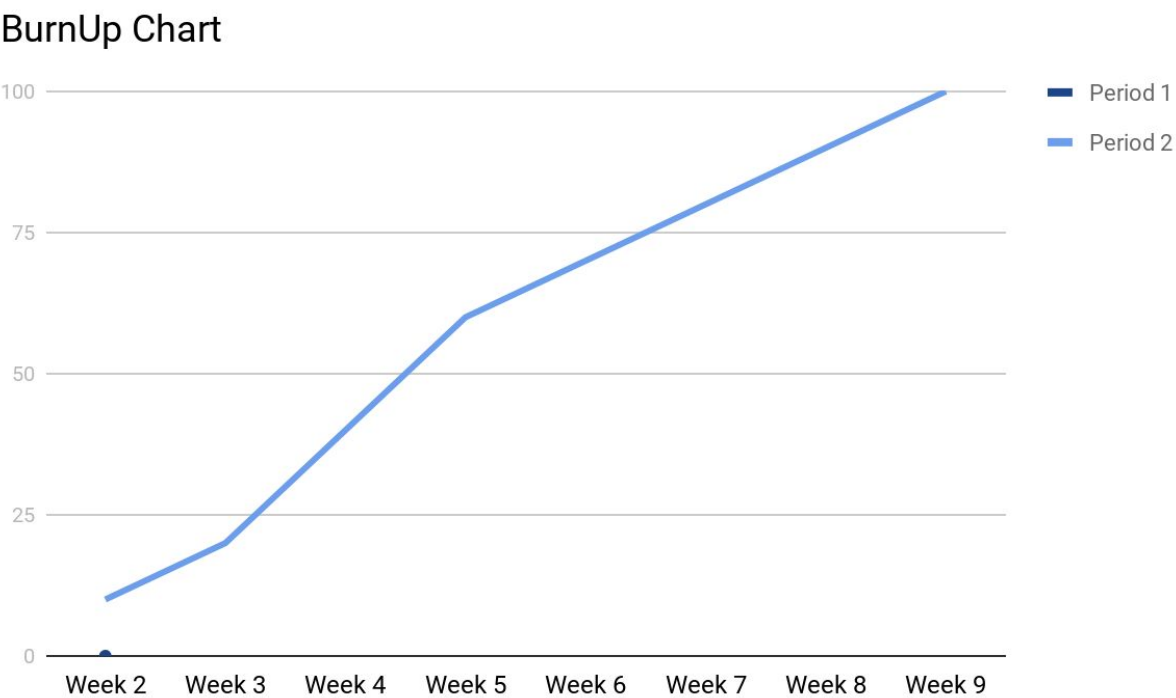

- Design a user login form. **(3)**
- implement the user login form **(3)**
- Implement the text post functionality

### Mia:

As a user, I want to be able to post information about myself and post my thoughts so that others will know who I am and what I am thinking **(29)**

- Design a profile page **(2)**
- Implement the profile page **(8)**
- Implementation to gather 1 sentence bio **(5)**

Initial burnup chart:

---

**Initial scrum board:**

User Stories	Tasks Not Started	Tasks in Progress	Task Completed
As a user, I want a website that I can log into	Configure and set up backend stuff		
As a user, I want to have my own account so I can interact with the website	Enable account creation		
	Enable login		
As a user I want a page where I can make text posts and look at my profile	Create a profile page which shows user info and where posts would go		
	Enable posts to be stored in database and to be shown on user profile		

---

**Scrum times:**

Thursdays: 3:30pm

Sundays: 5:30pm

Tuesdays: 3:30pm
