List of Known Problems:
- ○ Searching for users is case-sensitive:
  - ● Location: root/functions/index.js line 542-574
  - ● Fix: Unknown
- ✓ When User A sends a friend request to User B , User B's notifications show a friend request from themself
  - ● Location: Unknown
  - ● Fix: Unknown
- ✓ Sometimes multiple friend requests are shown
  - ● Location: Unknown
  - ● Fix: Unknown
- ○ Sometimes a CORS error will occur on the homepage when creating a post
  - ● Location: Unknown
  - ● Fix: Unknown
- ○ If you post a tiny image it will be stretched
  - ● Location: Unknown
  - ● Fix: Unknown
- ○ Sometimes when something should have been deleted the time will become 30 days
  - ● Location: Unknown
  - ● Fix: Unknown
- ○ If an image that is too large is uploaded as a User's Profile Picture
  - ● Location: Unknown
  - ● Fix: Unknown
- ○ If you are not logged in you can still go to pages only a logged in user can see.
  - ● Location: Unknown

- ● Fix: Unknown
  - ○ When you log out you are sent to root/user/login instead of just root/login
    - ● Location: Unknown
    - ● Fix: Unknown
  - ○ When you click a user's icon from another user's friends list it takes you to their page but doesn't close modal.
    - ● Location: root/user_profile/User_Profile.vue
    - ● Fix: Unknown
- ✓ Like notifications show up for the logged in user: say User A likes user A's post, user A will get a notification saying they liked their own post.
- ✓ Comment notifications show up for the logged in user: say User A comments on user A's post, user A will get a notification saying they commented on their own post.
- ✓ when clicking accept on a friend request sometimes another friend request will disappear
  - ○ Notifications for messages sometimes incorrect
  - ○ Not all the comments of a post will be listed
    - ● Pretty sure this is due to old comments not having a time field
  - ○ After a user has checked their new notifications and clicked away from the dropdown if they check it again the picture will not show up.
  - ○ If you enter information that is correctly formatted, but isn't affiliated with a user no error will be displayed.
- ✓ If you don't refresh page when you get a friend request there will be an error and accepting or denying will not work. You must refresh the page to properly add or deny the request.
- ✓ Going to a user A's page from user B's page without reloading keeps the Add/Remove button from user A's page.
- ✓ The search bar does not work after going to a user's page from the search dropdown menu without reloading.
- ✓ Sometimes Other people's posts show up on your timeline, that you are not friends with.

- ○ Does not show correct date that user joined on their profile
- ○ When looking at another user's friends list multiple copies of a friend will show up.
- ○ Sometimes you need to double click the add friend button
- ○ Add/Remove/Pending button takes a while to update
- ○ Add friend button sometimes requires 2 clicks, when this happens two friend requests will be sent

Suggested acceptance criteria for actual acceptance test:
- Make a new Account
- Log in
- Send Friend Requests
- Accept Friend Request
- Reject Friend Request
- View Friend Request
- Making a text Post
- Make an image Post
- Like a Post
- Unlike a Post
- Comment on a Post
- View all comments on a Post
- Hide all comments on a Post
- See number of comments on a Post
- Send message to a Friend
- Receive message from a friend
- Look at history of messages with a friend
- Choose different friends to message
- Search Users to view their profiles
- Update User's bio text
- Upload an image to be your profile image
- View a User's list of friends
- View a list of notifications about people who have commented or liked your posts

- Log out
